Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Art Unit: 3632

This is an office action for serial number 10/541,487.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

Claims 1-6 are rejected under 35 U.S.C. 103(a) as being unpatentable over Clarke GB 2,225,038 in view of Pylant 6,412,235. Clarke discloses a shaft (10), a box (11) with a floor (12), four side walls (13-16) with tow of the walls), defining bottom edges (see figure below), at least one pair of parallel spaced flanges (22 and 23). Pylant discloses all of the limitations of the claimed invention except for at least one helical blade and the bottom side of the slots is defined by the said floor. Pylant teaches that it is known to have helical blades (12). It would have been obvious to one having ordinary skill in the art at the time of the invention to have included the helical blades at taught by Pylant for the purpose of facilitating driving the shaft into the ground. It would have been an obvious matter of design choice to have made the bottom side of said slots being defined by the said floor, since such a

modification would have involved a mere change in the shape of a component. A change in shape is generally recognized as being within the level of ordinary skill in the art since the applicant has not shown how the chosen shape is critical.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Art Unit: 3632

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

The prior art discloses conventional post supports.
